Visualizing Data

... with a very small team

Selected projects

Schools, Elections, Traffic accidents,
Banks, Maps of conflict

Main problems

— Minimal amount of resources

Main problems

- Minimal amount of resources
- Tragically underestimating scale of the task

Main problems

- Minimal amount of resources
- Tragically underestimating scale of the task
- Absent, incomplete, "half-open", changing data

There is no silver bullet

There is no ultimate,
single, all-purpose tool for visualization

Invest your time heavily,
organize "hacks and hackers"-like events,
teach yourself a programming, outsource
